Lectures

If you are interested in knowing more about how energy works please check out Dr. Kronn's lecture. We have posted a composite of the lectures presented by Dr. Kronn this spring and summer on our website. It presents a clear and easily understood overview of the theoretical foundations for his technology. This presentation called "Energy - the Missing Link to Health" can be found in the *Lecture* section on our website at: www.energytoolsint.com.

Testimonials

The following information describes, in their own words, the experiences of practitioners who use energetics in combination with their standard protocols. They are finding that influencing the energetic system has a significant impact on accelerating the healing and repair process.

"Panic Attack" Significantly Improved

Mrs. P.T. had the clinical symptoms of a panic attack; she was in acute distress, and very anxious, with involuntary muscle contractions, and stiff neck muscles. Her pulse rate was 96-100 beats/min. and her breathing rate 24-26 breaths/min.

The protocol given to her consisted of 7 drops of *Tranquility* and 7 drops of *Stress Relief* in 8 oz of water with repeated dosage every 20 minutes for a total of 3 doses. About 30 min. after the last dosage, her panic attack condition was significantly improved: her pulse rate decreased to 70-72/min., breathing rate to 12-14/min.; she became progressively restful, and did not have involuntary muscle contractions. Her muscle spasticity was reduced more than 70% and she was able to manage her neck muscle movements quite well. Clearly, her condition was dramatically improved amazing her, Dr. Migliorini and me, as well.

As a researcher I believe that using *Tranquility* and *Stress Relief* can benefit several neurological disturbances considered "untreatable" with known conventional neurological medication.

Luis Romero, MD, PhD □

Seizures and Paralysis Ameliorated

From Dr. Steven Davis : "I have a 21 year-old patient from Oregon who had an acute appendicitis attack when he was 14 years old. He was treated in a hospital and when he came out of the anesthesia he started having grand mal seizures. He went through a variety of medication protocols in an attempt to normalize him. When he was about 16 years of age, one of the seizures was so bad that he had a stroke

that left him partially paralyzed on the left side of his body. He actually would go into mild seizures about every four to six hours, even when he was on medication. After starting him about nine months ago on *Stress Relief* and *Clear Mind*, his seizures have become virtually non-existent. He had been living at home with his mother but now he's living on his own and can take care of himself. His mother checks on him daily by phone and he's normalized very well. His neurologist in Medford, Oregon, is quite pleased with the outcome.

I saw him about three months ago. He was able to ambulate across the room, where before he actually had to use a crutch to make sure he could control himself. So, though the impairment is there, there is slow improvement. The nice thing is that he is functional, he's on his own, and he's moved into society; his mother had been quite fearful that he wouldn't. So that's a pretty impressive case for me." □

About Energetics

Depression

Dr. Tran's ex-employee

"I had a very striking case in one of my employees who worked at the clinic some 10 years ago. When she left here she went to work in a human dialysis outfit downtown. When I saw her she had been laid off by that organization because she could not get along with the co-workers. She told me that she had been suffering from manic-depression for 10 years, and was taking about half a dozen different kinds of medicine. When I met her she was a mess. She wasn't the person I used to know. She'd cry every 15 minutes, and she was very aggressive - very hostile to people, fighting with people all the time over little things. After talking to her I said, "Anna, why don't you try energy formulas?" I suggested she take these five formulas: *Harmony*, *Clear Mind*, *Foundation*, *Stress Relief*, and *Excel*, because she doesn't have any energy - she's always pooped out. You can see in her face that she is very depressed. Ten days later she came back for more and I asked, "How did it help you?" She said, "I went back to work and the people down there were very happy to have me back, because I'm a totally different person." She was very well dressed and well groomed - not like the person I'd seen 10 days earlier. It was one of the

most striking recoveries." - Dr. Gary Tran

Deep stress, doom and gloom

Dr. Steven Davis relates his general approach to depression symptoms. "In trying to diffuse the in-depth stress, the fear factor, *Stress Relief* is a very powerful tool. We start out patients at night with *Stress Relief* and *Balance* to get their circadian rhythms back on track through their nighttime behavior patterns. For the daytime behaviors, what we will use is *Clear Mind* and *Tranquility*. *Tranquility* is effective for clearing the depressed cycle, the hopelessness, the doom-and-gloom gray cloud. *Clear Mind* clears the foggy thinking, the confusion and the inability to "process" and reason. So what you have are four wonderful remedies, *Clear Mind*, *Tranquility*, *Stress Relief* and *Balance* that each have profound effects on different aspects of brain activity, allowing the energetic patterns of the brain to reset themselves."

Fasting and GI Aid

Dr. Jeff Marrongelle finds fasting a great way to re-regulate the Parasympathetic system, with highly therapeutic value for treating such conditions as vagus nerve disruption due to closed-head injuries, and other dis-regulations of the hypothalamus.

"I use *GI Aid* with

Stress Relief or *Tranquility* taken water during a fasting period as part of the re-hydration process that we're now using.

I use very low doses—one or two drops—of the *GI Aid* and *Stress Relief* and *Thymus* in every four ounces of water throughout the day, and have them doing 10-12 doses a day for two days or three days. This low-dose high-frequency really boosts the energy system. And I suspend all nutrients during that time. I don't change anybody's prescription meds because I can't—but it's okay to give your body a rest from your herbals and homeopathy and nutrition for two or three days once in a while. It's a good concept."

Chronic fatigue

Adrenal Failure

Dr. Davis has been privvy to some new energy tools, and has found them to be invaluable in addressing problems associated with chronic fatigue:

"The stubborn thing that happens during the energy cycle is adrenal failure. Some of you do saliva-testing, some don't, some use Vega-testing and other types of computer-aided acupuncture devices, but in the process what you'll find is that adrenal failure is always part of the picture. And what you'll also find is that their DHEA and cortisols are

either not working at all—they're flat lined—or they're disassociated, meaning their DHEA is down and cortisols are up.

"What we have done is tinkered around with two herbal remedies. Yury has mapped the energies of these herbs and developed several formulations, which include tinctures of the herbal extracts. We made an acute and chronic version of each of the two formulations called *Fatigue* and *Adapt*. What we do, through muscle testing and Vega-testing is to check which formula, the *Chronic* or *Acute Fatigue* (for example) the patient tests most strongly for. I have found that if a patient tests most strongly for the *Chronic Fatigue*, their adrenal failure is not as severe as it may initially look. If they test more strongly for the *Acute Fatigue*, their adrenal failure is really quite severe."

"The *Adapt* formulations, *Chronic Adapt* and *Acute Adapt*, have the ability to actually cascade through the entire failed hormonal system - the pituitary, pancreas, adrenals and the gonads. We find that by using the *Fatigue* and *Adapt* in combination with *Acute Immune* and *Thymus* in the daytime, we are able to resurrect the energy flow. If we can get the biological clock working so the daytime energy fires as it should and at night the body goes into rest and recovery, we can diffuse the stressors. If we can do this, wonderful behaviors start to happen with the patient."

Research

We are planning to do a clinical study on stress and depression and have put together a research form for this purpose. We ask for participation from practitioners who are working with patients in these categories. Please contact us if you are interested in taking part in this study.

What's New?

We have posted a "Research Outline for Applications of Vital Force™ Technology" in the *Research* section of our website. We invite you to look at it at www.energytoolsint.com. Please contact us if you are interested in participating in a research project or know of someone else who might be interested.

Currently we have a number of new studies in the start-up phase at several universities and institutions. The details will be posted as they develop.

Protocols and Testing Methods

Acne and Rosacea

Elina Fedotova of *Elina's Herbal Skin Care Clinic* has recently made the Vital Force™ Formulas part of her treatment protocol for Acne and Rosacea. She is having great success with the formulas in combination with her all organic herbal treatment program.

Elina's customers have found the following dosages beneficial--

Per Condition: Take 5 drops of each recommended Vital Force™ Formula - morning and evening.

Topical Application: Apply Healthy Skin directly to blemishes.

Elina's customers have also found Healthy Skin to be helpful for herpes.

Placebo Effect

To satisfy himself that what he was seeing with the Vital Force™ formulas was not a placebo effect, Dr. Marrongelle blind-

| | |
|---------------------------|--|
| Simple Acne | Healthy Skin + Balance or Healthy Skin + Balance + Acute Adapt |
| Cystic Acne | Healthy Skin + Balance + Acute Adapt + Restore |
| Rosacea | Healthy Skin + Balance + Acute Adapt + Restore |
| Acne related to chin area | Healthy Skin + Balance + Healthy GI |

tested to his own satisfaction.

"I wanted to rule out a placebo effect, or the carrier effect—that the carrier solution was as valuable or more valuable than the energetic influence. So I did some blind studies with my colleagues in the office and with a number of patients. I took two baseline Heart Rate Variability tests and then gave the subjects the placebo alone in a measured amount of distilled water and re-examined the heart rate.

Usually the scatter diagram on those three were very similar. There

were non-clinical changes, nothing significant. I then utilized the energized product, and we'd see significant changes in heart rate variability and autonomic nervous system control. We did that with about 50 patients. It was a basic clinical trial, but it satisfied my need to know whether the saline solution that is the carrier was having a physiological influence on the autonomic nervous system by itself, or whether it was actually the energy influence. The differentiation was pretty plain to see."

On the Animal Front

We have recently expanded our group of practitioners to include several vets who are testing applications for use of the Vital Force™ formulas in organic dairies. It is our hope that Vital Force™ Formulas can assist organic farmers with effective non-toxic health maintenance protocols to lower the incidence of conditions such as mastitis, scours, shipping fever and a host of other animal husbandry challenges.

Energy Even Works on Snakes

Some time ago Dr. Gary Tran of the Animal Emergency Center in Louisville, Kentucky had the dubious pleasure of being asked to treat a very sick Python. The Python was traveling with his owner, far from home and his accustomed veterinarian. He had been undergoing conventional treatments for

pneumonia for two weeks prior to leaving home. Over the weekend he suddenly took a turn for the worse and by the time he was brought in to Dr. Tran's emergency clinic he was heaving and blowing bubbles from his nose. Dr. Tran treated

him with *GI Aid*, *Thymus*, *Acute Immune* and *Noni Juice*. The snake soon stopped heaving and within two hours the bubbling coming from his lungs had cleared up. Dr. Tran was happy to see the Python in better health and heading out the door of his clinic. The snake returned to the Washington D.C. area with his happy owner with no further signs of pneumonia. We were all surprised to find that the formulas work on snakes just as well as they do on people!

More about energetics

General Dysfunction

“With dysfunctional and diseased individuals we know we have a toxic environment, we know that their detox portals are impaired, we know that the immune system is struggling, and we also know brain function is not optimal. So in the process of this, they have not only emotional instability, they also have failed hormonal systems and failed immune systems. So what I do is try to sort out which is the weakest link in their failure, and we try to energize them using subtle energy in those areas where they’re weakest, and and then move forward constantly

monitoring them.” - *Dr. Steven Davis*

Elderly People and Energetics

“Eighty-year olds can be on four or five formulas taking three or four drops, three or four times a day. And man, it’ll perk them up. It’ll rock their world.” -- *Dr. Jeff Marrongelle*

Chronic Fatigue

“There are some patients that have depression as their overlaying challenge, and some just have foggy thinking. So along with *Stress Relief*, we’ll use *Tranquility* and that helps with the depressed cycles, whether it’s exogenous or endogenous—depends on what’s going on with them and

how long they’ve had the chronic fatigue. For those that have the foggy thinking as their primary focus, what I find interesting is that they are groping around looking for somebody that will help them, but then they’ll go through a whole grocery list of things that are bothering them. It is a true multi-causal phenomenon that has to be treated as a group, rather than trying to isolate it. So what I found a few months ago, is that by combining different remedies at different times based on the patient, we can keep them going forward rather than plateau-ing or going into the I-feel-good-today-and-terrible-tomorrow cycle.” --*Dr. Steven Davis*

Quotable Quotes

Dr. Steven Davis...

“So, all disease, that I’m aware of, is dealing with a Parasympathetic system that has failed, and a Sympathetic system in overdrive.”

Dr. Jeff Marrongelle...

“When I was introduced to the Vital Force products years ago, I was impressed at how strongly they reacted on ElectroAccupuncture testing. They gave a very positive ‘yes’ or ‘no’ response. They weren’t very equivocal. I saw them as a missing link in energetic medicine.”

Dr. Jeff Marrongelle...

“What the Vital Force does is organize (energy), orchestrate it, and stabilize it. I think this is where the Vital Force products really influence our physiology. They organize the energy.”

Dr. Gary Tran...

“I also use *Stress Relief* for separation anxiety in animals, when they are hospitalized, in a boarding environment, or when their owners have left the house on a trip. A lot of people like that, because it’s natural and they don’t have all the side effects.”
