Vital Force Solutions for the Health Practitioner

“Few fields of science offer greater hope for lifting the emotional and physical burdens of today’s human race than the science of Vital Force. My passion is to make available an affordable new wellness strategy that supports today’s health professionals who are ushering in that new world of health and wellness.”

Dr. Yury Kronn, Ph.D

This product catalog profiles and describes a variety of unique proprietary formulas derived from the science of Vital Force. The inventor is Dr. Yury Kronn, who came from Russia where he was recognized as one of the world’s leading quantum radio-physicists. Today, his Vital Force Technology makes it possible to harness subtle energy like conventional science harnesses electromagnetic energy. The products described in this catalog are the result of this proprietary technology. This catalog profiles more than 50 formulas, each of them distinguished by a unique Vital Force signature that delivers its positive modifying influence safely and non-invasively to the human body.

Dr. Kronn uses the analogy of computer software to explain his science and underscore the significance of Vital Force body re-programming.

“We have learned to make complex mathematical calculations possible,” he says, “by manipulating the electrical impulses we call ‘software’ that govern our computer hardware. The human body is similar. The software that governs the human body is a non-electromagnetic energy called Subtle Energy. It is the body’s own Vital Force. One of the great developments that one day may change the world’s health industry involves new capabilities to re-script one’s Vital Force in order to improve the software that programs the functions of our own physical body.”

In this catalog of products you will find unique and effective strategies for health and wellness. A more comprehensive description of this technology and the science behind these products is set forth in our company presentation, *Harnessing the Science of Vital Force*, available upon request.
